INTERNATIONAL RELATIONS NATIONAL UNIVERSITY OF MAR DEL PLATA FACULTY OF ARCHITECTURE, URBAN PLANNING AND DESIGN

The Faculty of Architecture, Urbanism and Design has 47 years of history during which it has achieved important recognitions as an institution integrated to different educational, cultural and professional fields. Nowadays, it offers 5 undergraduate careers, 1 doctorate, 4 master's degrees, 1 specialization. Its Headquarters is located in the Manuel Belgrano University Campus, with an annexed office, both in the city of Mar del Plata. To them we can add: CRESTA Headquarters, in the city of Tres Arroyos; Villa la Angostura Headquarters, in Neuquén; Higher Institute for Teacher and Technical Training No. 81 Headquarters and House of History and Culture of the Bicentennial, both in the city of Miramar. Its community, of almost 400 teachers, 30 non-teachers, 5,000 graduates, 180 post-graduates and more than 3,000 students, gives content in the different levels and modalities to teaching, research, extension and co-government management, within a democratic and participatory framework. As the second decade of the 21st century comes to an end, the faculty aims to continue contributing to the social progress of the country and the region ensuring excellence in the process of training professionals who exercise with skills, ethics and democratic commitment the knowledge that is produced and reproduced in the field.

Associate Degree in Cultural Management

RESEARCH LINES

The lines of action in research of the FAUD are based on the articulated work of the different Nuclei of Scientific and Technological Activities [NACT] located in our Faculty - Institutes, Centers, Programs and Research Groups-, as well as with the Center for Documentation [DOCFAUD] and the Institutional Repository [RFAUD].

The research activities have in our faculty a development of more than three decades and are currently structured in three Institutes, two centers, one Program and three groups dependent on the Secretary of Research and Postgraduate. In these venues, more than thirty research projects are being approved and subsidized mostly by the UNMDP. They cover the different disciplinary areas that structure Architecture, Urbanism, Industrial Design and Cultural Management. Its results are transferred to the postgraduate programs that depend on the institutes and centers in relation to undergraduate careers, as well as to the social and productive environment based on the Extension and Transfer activities of the FAUD. The Institutes and Research Centers of the FAUD are:

- Institute of History, Heritage and Material Culture Studies [IEHPAC]
- Institute of Habitat and Environment [IHAm]
- Urban Development, Technology and Housing Research Institute [IIDUTyV]
- Design Studies Center [CED]
- Project Research and Industrial Design Actions Center [CIPADI]

The results of the research carried out in the different NACT is reflected in a specialized and quality scientific production, that can be checked in presentations at events, books and refereed articles published in national and international media. Today we are in a process of transformation and growth that will allow us to address and deepen lines of work in the training disciplines in which the institution has entered.

EXTENSION LINES

The university extension activity at FAUD aims to strengthen the link with society by responding to the socio-productive and cultural needs of the community; promoting relevant programs and projects and in correspondence with the institutional objectives of FAUD and the UNMDP.

The extension projects in the FAUD are framed in two programs "Universal Design and Human Development" and "Habitat, Housing and Environmental Quality".

- Universal design and human development: groups, promotes and develops projects of high inter-institutional articulation, which promote inclusive physical and social environments for people with different disabilities. The program is articulated with other programs, with undergraduate teaching and with research.
- Habitat, Housing and Environmental Quality: groups, promotes and develops projects of high territorial impact in the short term emergency, destined to intervene in vulnerable sectors in terms of civil rights and life quality. The program is articulated with other programs, with undergraduate teaching and with research.

TRANSFER AND LINKAGE LINES

The relationship and integration of the Faculty of Architecture, Urbanism and Design, of the UNMDP, with private and public business sectors, has been a concern that, in recent years, has resulted in a growing link with the society that sustains it. It has more than 20 years of experience in the development of transfer activities that allow the development of four substantive lines:

- *Human Resources Training*: It includes the realization of courses, seminars, conferences, and / or training sessions, at the request of a third party.
- *Technical Assistance and Service*: Refers to the execution of routine analysis, measurements or evaluations and consulting tasks in general, which are focused on covering the environment's deficiencies, whether it is knowledge of specific topics, scientific work methodology or competent infrastructure, or attend those cases in which the University is a reference without particular interests.
- *Technological Innovation Services*: refers to those projects that arise from a specific offer or at the request of contractors and that a transmission of knowledge, technology, and / or new or original adaptations. This aspect also includes the exploitation of patents, licenses or trademarks, copyrights and publishing in accordance with current legislation.

de MAR DEL PLATA
.....

- *Cultural Services*: this point includes the activities that tend to the preservation, transmission and generation of culture, strengthening the formation of the integral personality of the members of society at the request of a third party.

The relationship and integration of the Faculty of Architecture, Urbanism and Design, of the UNMDP, with the public sectors -municipalities, national and provincial organisms, decentralized entities, private, social, professional, community organizations, etc., has been a concern that, in recent years, resulted in an ever-increasing link with the society that supports it.

For this reason, the formalization of collaboration agreements has been promoted through which research and extension projects, assisted pre-professional practices, community-based practices, volunteering, inter-institutional activities, among other actions, are boosted. Likewise, in order to strengthen the link with the environment, training workshops are developed to promote entrepreneurship, preparation for work, insertion in the productive market, among other areas.
